DyscalculiaServices.com

Dr. Schreuder follows and implements the latest research on the subject of learning differences and best practices for intervention.

Dyscalculia Services does a complete evaluation for learning differences. The evaluation provides for a general mental development, screening for visual-spatial abilities, screening for reading level and dyslexia, screening for math level and dyscalculia, and gaps in particular mathematical areas. The information will cumulate in a detailed report and plan for intervention, taking into account the student's strengths and weaknesses,

A shorter Math and Dyscalculia assessment is also available when it is clear that the issues are mainly manifesting in the area of Math.

Dr. Schreuder also provides tier 3 tutoring to children at their school, their home or on site. Both assessments and tutoring are also available via Skype and we work effectively with teenagers in several states and countries.

Dyscalculia Tutor Training Online

DyscalculiaTutor.org

The Dyscalculia Training Center was formed to have one place where we can focus all our efforts to share our knowledge of almost 10 years of tier 2 and tier 3 intervention with people who are dealing with Dyscalculia. We train Students, Teachers, Parents and Tutors in Math & Dyscalculia in a variety of ways.

We organize workshops in the greater Houston area every few months and at request we visit school(districts) in other areas to present our workshop.

Dr. Schreuder presents at professional development days for teachers.

A major initiative is at this moment to bring our Dyscalculia Tutor Course online so teachers from all over can access it and attain the certification by Dr. Schreuder. Planning is to have this completed in the summer of 2017.

Dyscalculia Tutor Training

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Dyscalculia Tutor Training Online

Dr. Schreuder has developed an online Dyscalculia Tutor Training to increase the number of available Dyscalculia tutors.

In over 50 videos she trains teachers and math tutors to become Dyscalculia Specialists and Tutors.

Work at your own pace, from anywhere you want online to achieve the certification.

Details are available at www.DyscalculiaTutor.org

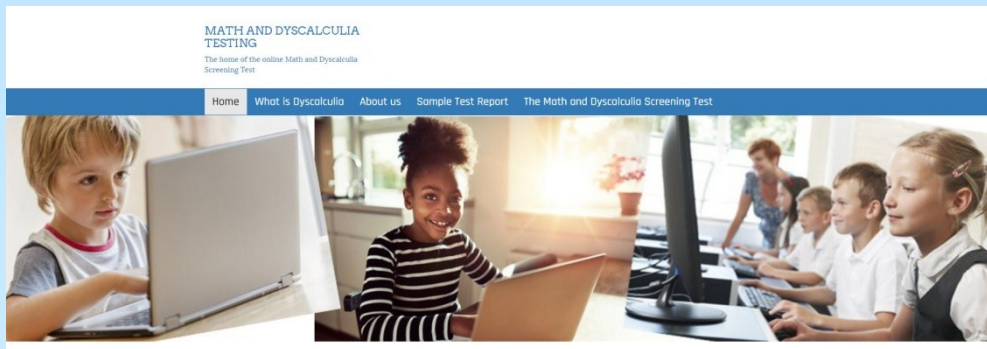

Dyscalculia Testing

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Online Math and Dyscalculia
Screening Test

DyscalculiaTesting.com

The online Math and Dyscalculia Screener Test is a service to those who want to know if they could have a Math Learning Disability or Dyscalculia.

The complete online Math and Dyscalculia Screener Test has 15 parts, but no one will complete all 15 parts. Depending on their age and grade one will complete a maximum of 14 or a minimum of 8 parts of the online Math and Dyscalculia Screener Test.

A report is emailed shortly after completing the test and gives a good indication about the math levels for relevant math operations and if signs of Dyscalculia are present.

For full evaluation and complete recommendations about accommodation at school and a thorough gap analysis of the Math knowledge of the student we would have to do a one on one assessment in person.

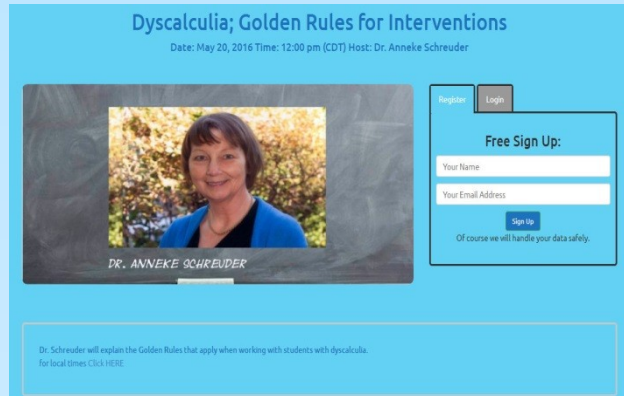

Dyscalculia Webinars

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Free weekly webinars

Webinars.DyscalculiaServices.com

Dr. Schreuder, offers free webinars about Dyscalculia on a regular basis.

The current cycle includes the following topics:

- * Dyscalculia and Math Anxiety, an introduction
- * Dyscalculia in the Classroom
- * Dyscalculia: Effective use of Manipulatives
- * Dyscalculia: Golden Rules for Interventions
- * Dyscalculia; Early warning signs, screening and testing

The webinars are replayed weekly and offer a good first introduction in Dyscalculia.

Upon completing of a survey with questions, participants can receive a certificate of completion.

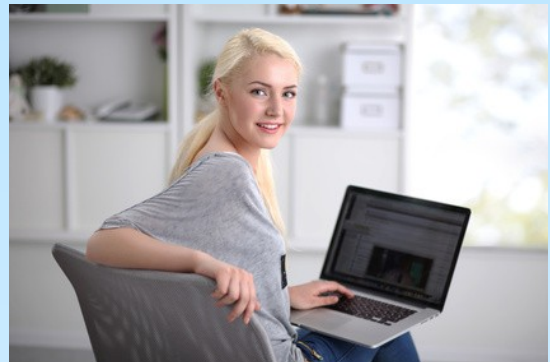

Awareness Training

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Awareness Training On Site
Online

DyscalculiaAwareness.org

The Dyscalculia Awareness Training is a must for every teacher. Most teachers know the A, B, C of Dyslexia, we offer them the 1, 2, 3 of Dyscalculia.

Dr. Schreuder has developed a very effective awareness training that features the following topics:

- * Dyscalculia Explained
- * Developmental Dyscalculia and Number sense
- * Working Memory, Processing Speed, and Attention
- * How do we recognize Dyscalculia
- * How can we help people with Dyscalculia

Building on the success of her on site delivery of this training, we have recorded this to be able to share it nationwide and beyond.

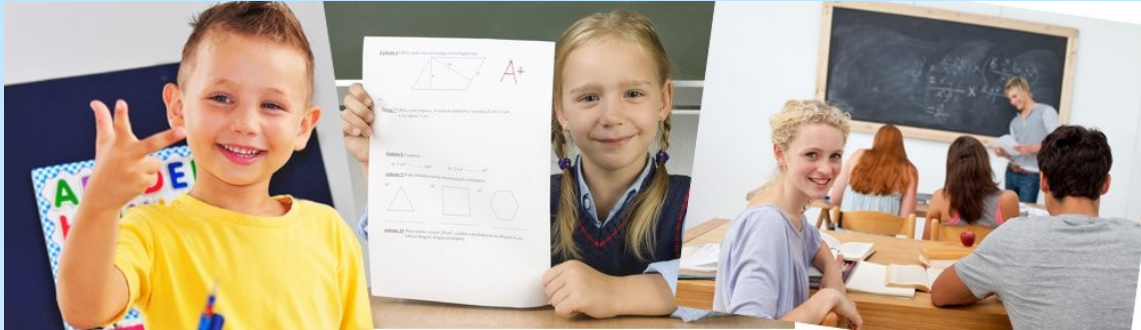

Dyscalculia Headlines

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Daily Dyscalculia News

DyscalculiaHeadlines.com

As Dyscalculia is not that well know yet, it can be hard to find useful information about it.

To ensure interested people will be able to find the information they need we post most workdays one item related to Dyscalculia.

The value of our Dyscalculia Headlines site is in the categories that are given to each topic and the links to original content.

By clicking the category links people get access to information built up over a range of years.

Via social media, past links are shared continuously in an effort to enhance the awareness of Dyscalculia.

We are proud that thousands of people visit the site every week and find value in the information offered.

Every week Dr. Schreuder produces a Podcast where she and the editor discuss the links for that week. The podcasts are available in the iTunes store, search for Dyscalculia Headlines.

We know that there are many very dedicated parents around the country who are homeschooling their children for a variety of reasons. We also know that the Math portion of the regular Home school curriculum versions can be challenging.

So Dr. Schreuder has developed this resource to aid parents in their efforts. In her own clear way she explains what has worked in her practice of working with children who need help with Math. She is passionate about the topic and shows exactly what parents need to do and say to help their child mastering Math.

The Course/Resource offers:

35 Videos (and more added in the near future)

Over 4 hours of video

Over 150 downloadable pages with tips explanations and activities

Direct email support for your specific questions

Math Summer Camp

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Math Summer Camp

HoustonMath.com

To prevent the “Summer Slide” Dr. Schreuder had developed a Summer Math Camp in the Houston Area. The camp has modules focused on Math Enrichment, Consolidation of skills and knowledge acquired in the past year, pre-teach the Math basics expected for the next school year and lots of fun activities and games.

The various modules leave enough room to also provide support for particular Math issues a student has experienced.

Sessions are led by Dr. Schreuder who is specialized to work with children with Math difficulties and is an expert in child development.
